Summary

Aspiring Artificial Intelligence Data Science Engineer with strong expertise in programming, machine learning, and DevOps practices. Skilled in building end-to-end ML solutions, deploying production-ready applications, and automating workflows using CI/CD pipelines and cloud infrastructure. Experienced in Python, SQL, HTML/CSS, Java, and modern DevOps tools including Docker, Kubernetes, Ansible, Terraform, Jenkins, and AWS. Completed multiple certifications in SQL, Python, and Cloud technologies, and developed hands-on projects in MLOps, AI-based analytics, and automated trading systems. Passionate about leveraging technical skills to solve real-world problems, contribute to innovative projects, and grow within a dynamic and challenging organization.

Technical Skills

- **Languages:** Python, C, Java, SQL, HTML/CSS
- **Machine Learning / Data Science:** Data Pre-processing, ML Models
- **DevOps / Tools:** CI/CD, Jenkins, Docker, Kubernetes, Ansible, Terraform, Git/GitHub, Linux, Shell Scripting, AWS (Basics), Prometheus, Grafana

Education

ISL Engineering College, Hyderabad

2026

B.E. in Artificial Intelligence and Data Science

CGPA: 8.5

Internships & Leadership

- AWS Academy Data Engineering Virtual Internship
- AWS Academy Cloud Foundations Virtual Internship
- AWS Academy Cloud Architecting Virtual Internship

Key Projects

- **Customer Churn Analysis using Ensemble Techniques** — Machine learning solution to predict customer churn using ensemble models with MLOps workflow. Technologies: Python, Scikit-Learn, Pandas, Docker, CI/CD. GitHub
- **JupiTrade** — Automated stock trading simulation platform using real-time data analysis and predictive algorithms. Technologies: Python, ML, APIs, Streamlit/Jupyter. GitHub
- **Repo-Sage** — Repository management and automation tool with CI/CD integration and analytics for developers. Technologies: Python, Docker, GitHub API, Bash. GitHub

Certifications

- SQL for Data Science — Great Learning Academy
- Python Essentials — Cisco Networking Academy
- Javascript and ReactJS — devtown
